IU International University of Applied Sciences **Software Development Degree** Scholarship for a 3 year online degree	2022-2024

NEO NGWENYA

FRONT-END DEVELOPER

To whom may it concern,

I have spent over 900 hours in the past two-months, increasing my development skill. (certificates can be viewed on my LinkedIn.)

I am a self-driven, eager to learn developer who would be grateful for an opportunity to enter into the IT world. My portfolio website showcases my skill and other projects that I have worked on. (https://neo-ngwenya.netlify.app/) - PLEASE VIEW.

I would make a great addition to any team because I am passionate about Front-End development, I'm a very fast learner and a team-player.

Some may view being a self-taught developer as a weakness but I feel that because of it, I have mastered the skill of knowing where to go when I encounter a difficult code or need to learn something fast, being self-taught has also increased my problem-solving skill.

Regards,
Neo Ngwenya
